*Airfare to Belize City (BZE) is not included.

Located in Central America just below Mexico lies Belize a wonder of the Western Caribbean Sea.

Offshore from Belize lie several Cayes and atolls and the 185 mile long barrier reef, the largest in the Western Hemisphere, varies from 8 to 16 miles from the mainland to less than one mile offshore from Ambergris Caye.

Ambergris Caye is justly the most popular attraction to the tourists who come to Belize. The factor that most contributes to this is the unbelievably superb diving & snorkeling conditions. Accessibility to the dive sites, such as Lighthouse Reef, Turneffe Islands, as well as many excellent sites right off Ambergris Caye, combined with excellent weather conditions, clear warm water, the variety of dive sites and an average water temperature of 84 degrees Fahrenheit in August.

You can often see turtles, moray eels, barracuda, king mackerel, eagle rays and southern stingrays, as well as the little things like Pedersen shrimp, colorful gobies cleaning stations, and Spotted Drums.
